Mobile App Developer

We require a Techno Commercial Mobile App Developer to join our App team.
If you're passionate about mobile platforms and translating code into user-friendly apps, we would like to meet you. As a Mobile developer, you'll collaborate with internal teams to develop functional mobile applications, while working in a fast-paced environment.

Key Responsibilities

- Producing fully functional mobile applications
- Supporting the entire application lifecycle (concept, design, test, release, and support)
- Designing interface to improve user experience
- Troubleshooting and debugging to optimize performance
- Implementation of automated testing platforms and unit tests
- Liaising with the Product development team to plan new features
- Working closely with colleagues to constantly innovate app functionality and design
- Researching and proposing new mobile products, applications, and protocols
- Staying up to date with technology trends
- Interacting with clients to get their feedback

Technical Skills

- At least 2-3 years' experience of developing mobile applications on either Android (Kotlin) or iOS (Swift) or both platforms
- Understanding of Android and Apple's design principles and interface guidelines
- Familiarity with OOP design principles
- Understanding of common design patterns - MVC, MVVM, MVP
- Hands on experience working with remote data via REST APIs, JSON, XML
- Familiarity with Room and SQLite
- Experience with third-party libraries and APIs
- Familiarity using Scrum/Agile development methodologies
- Familiarity with CI/CD
- Must have development experience on both tablets and phones
- Hands on experience with in-app purchases
- Familiarity with AR and AI is a big plus

Do you have what it takes?

- Excellent analytical skills with a good problem-solving attitude
- Self-driven and ability to work with minimal direction and in a team to research innovative solutions to challenging business/technical problems.
- Communication…
- Innovation…
- Initiative…
