

# Windowmaker Option Commercial Contracts

## Overview: What is it about?

Large commercial projects spread over a period of time can be easily handled through the commercial contracts option. This option allows you to create a master order and offer the quote for the entire project. The product items of this master order can then be divided into sub-orders (and still be linked to the master) to be manufactured and delivered in phases.

Sales Order J0160 : Famous Glass : Input

## Benefits and Features: Why use this option?

- ▲ Ease of handling a large phased order
  - Schedule, manufacture and deliver all products individually as required and yet keep them connected as a single identifiable order
  - Manage sub-orders easily by a) transferring items from main order to the sub-order b) transferring products from one sub-order to another
  - Each sub-order can be independently scheduled for survey, production, delivery and installation
- ▲ Better inventory control
  - Phased deliveries help reduce over-stocking.
- ▲ Efficient allocation of time and resources
  - With sub-orders and deliveries phased, you can manage time, machinery and labour better.
