

Windowmaker Option Global Changes

Overview: What is it about?

The Global Changes option allows you to apply changes to the specifications (systems, glass, accessories) for all or selected products in an order.

Benefits and Features: Why use this option?

- ▲ Faster response to the customer by rapidly making the changes needed at the quote level
 - Apply changes to the products with a few clicks
 - Automatically re-calculate prices but apply them at discretion
 - Freeze (or unfreeze) the price and/or discounts at the order level
- ▲ Freedom from monotony to apply changes to products one by one
- ▲ Restricted possibility of errors involved with making changes for each product singly
- ▲ Ability to conduct 'what-if' scenarios for various parameters e.g. discounts for large orders
