# JOB Description Full-Stack Software Engineer

Windowmaker, an innovative software business established in 1983, has been continuously growing year on year due to its continued success. With ongoing market developments and investments within the company, exciting times are ahead for our team!

## The Role

We seek a full-stack engineer who is comfortable with both front-end and back-end development. You'll work under the guidance of our Product and Software Delivery Manager, collaborating with our experienced developers, testers, and UX designers. Our Engineering Team is known for its friendliness, creativity, and eagerness to tackle challenges. If you possess a good sense of humor and a positive attitude, we encourage you to apply!

## Our Technology

**Front-end:** Angular (or a good understanding of React, Vue JS, Knockout JS, or similar), JavaScript, HTML5, CSS

**Back-end:** C#, ASP.NET, Web API, MVC, Entity Framework

**Database:** SQL Server (knowledge of non-SQL databases is a plus)

**Cloud:** Microsoft Azure, AWS

## Responsibilities

- Translating UI/UX wireframes to visual elements.
- Implementing a robust set of services and APIs to power the web application.
- Building reusable code and libraries for future use.
- Optimizing the application for maximum speed and scalability.
- Implementing security and data protection.
- Integrating the front-end and back-end aspects of the web application.

## Tech Skills and Qualifications

- 2-5 years of relevant experience in our technology stack
- Good understanding of Cloud Native architecture, containerization, Docker, Microsoft Azure/AWS, CI/CD, and DevOps culture
- Knowledge of cloud-based SaaS applications/architecture
- Good understanding of Angular and JavaScript testing frameworks (such as Jest, Mocha, etc.)
- Practical experience in using leading engineering practices and principles
- Practical experience of building robust solutions at a large scale
- Appreciation for the functions of Product and Design, with experience working in cross-functional teams

# JOB Description Full-Stack Software Engineer

- Understanding of the differences between multiple delivery platforms (such as mobile vs. desktop) and optimizing output to match the specific platform

## Soft Skills

- Willingness to take ownership of every step of the development process, from refining tickets to shipping the code to production
- Willingness to do your best and ask for help when needed
- Interest or desire to learn about every part of the stack
- Willingness to make the codebase better for the next person who visits it
