General Enhancements

Special Terms – User Rights

Users with either Price or Discount change rights can now access Special Terms dialog on Quote/Order Pricing page. Earlier it was only available if user had Price change rights.

It is now possible to edit Discount % or Total Nett value of Base price (excluding Extras) from Special Terms dialog.

Before upgrade:

Edit rules from 'Where Used' dialog

It is now possible to edit or delete rules and products from 'Where Used' dialog itself. This will make data maintenance quicker.

The screenshot shows the 'Where Used' dialog for a selected rule. The dialog is titled 'Where Used: Fab. Labour Group'. It contains a table with columns: Product Type, Module, Product ID, and Product No. The table lists several products, including '1868 Mullion <->' which is highlighted in blue. Below the table, there is a 'Details' section for the selected rule. The 'Rule No.' field is highlighted with a red box. A red arrow points from the 'Where Used' dialog to the 'Rule No.' field. The 'Details' section also shows the rule's description, quantity, and other attributes.

Update cost matrices using Export/Import

The export-import of cost matrices using CSV files is now enhanced to:

- Update indices
- Add/delete rows/columns

Enhancements to Options

Stock Control

It is now possible to edit the order quantity for a component if the status of the Purchase record is less than Ordered. The quantity for a component can be set to zero if it must be excluded from that Purchase.

Purchase Order for stocked components now show Unit Qty and Total quantity, making it more informative and easy to understand.

Multiline Description

The number of Options that can be set-up for multiline description template on Order Type and System is now increased from 20 to 30.

Link to CAD I/II

Windowmaker Link to CAD now works with AutoCAD® 2019. AutoCAD® 2010 is no longer supported.

Link to Saw

Windowmaker can now link to [FOM saws](#) that use P2K2 protocol e.g. Blitz, Blitz Alva, Keope.

Link to Welder

Windowmaker can now link to URBAN AKS6250 4-head welder.

Link to Working Centre

Windowmaker can now link to:

- ▲ Schtec SMC 320 Working Centre
- ▲ [FOM Working Centres](#) that use P2K2 protocol e.g. Axel, Titan, Agro.

Link to Working Centre, Bar Optimisation

Operation-free length can now be specified from bar end also. Pieces are re-sequenced so that the last piece to be cut from the bar does not have any operation within the specified length.

Before Upgrade:

Before Upgrade: The screenshot shows a 'Piece Sequence' dialog box with three radio button options: 'Shortest to Longest', 'Longest to Shortest' (which is selected), and 'Alternately'. Below these options is a text input field labeled 'Operation-free Length from Bar Start' with the value '200' entered. A red box highlights this input field.

After Upgrade:

After Upgrade: The screenshot shows the same 'Piece Sequence' dialog box. The 'Longest to Shortest' option is still selected. Below the radio buttons, there is a 'from' label and two radio button options: 'Bar Start' and 'Bar End' (which is selected). The 'Operation-free Length' input field still contains '200'. A red box highlights the 'Bar End' radio button and the 'Operation-free Length' input field.
