# Windowmaker 2021 R2.3
## Release Document

**Windowmaker 2021 R2.3**

## What's New

This section lists the important features/updates introduced in this release.

## General Enhancements

### Windows 11 and Windows Server 2022 Support

Windowmaker now supports running on Windows 11 and Windows Server 2022 operating systems.

### Regression Test

Windowmaker now provides a 'Regression Test' facility to test data correctness. It is useful whenever you:

- Incorporate data changes
- Upgrade to a new program version or
- Use a new License file

For a 'TEST' Order, the program allows to compare the BOM between the new and the previous versions. The output can be used to:

- Validate the BOM for any desired data changes
- Identify and correct any undesired changes in the BOM

The new feature simplifies the testing process of an upgraded data/program version. Its increased reliability helps to go live with the new version much sooner.

Refer Windowmaker Help topic 'How to use Regression Test' for details.

## Issues Fixed

### Windowmaker 2021 R2.3 SP1

**Sales - Order Entry - Global Changes - 16703**
The problem with Sales line discount applied via Global changes not getting applied on Curtain wall sales lines is now fixed.

**Sales - Pricing - Deposit - 17153**
Deposit value sometimes not allowed to be added even if sum of all deposits was equal to Invoice total. This is now fixed.

**Sales - Order Entry - Sub-Orders - 16519**
When creating sub-orders from a Phased order, 'Del. Street Line 1' of the address was set to blank for users who do not have the Surveying option. This is now corrected.

**Windowseller - Sales - Pricing - 17436**
Discount given in the Customer Special terms for the reseller customer in Windowmaker, was not getting applied in the sales orders in Windowseller, thereby calculating an incorrect cost. This is now rectified.

**Products - Systems - Rules - 16607**
When setting up rule conditions for Options, the correct Option number was not saved if the drop down for options was sorted on Description rather than ID. This is now corrected.

## Windowmaker 2021 R2.3

**Sales - Order Entry - Pricing Page - 15994**
The Deposit value for a Sales Order was set to zero after Invoicing. This now fixed.

**Sales - Line Configuration - Design - 16123**
The issue with the 'Match design' functionality is now fixed.

**Sales - Order Entry - User Defined Fields - 15615**
The values of User Defined Fields were not visible to users who did not have permission to Modify (but View) Sales Headers. The user can now see the values of these fields like other fields of the Sales header.

**Sales - Reports - 16041**
Installation Material report gave an error on running. This is now corrected.

**General - Reports - 15290**
Some Windowmaker reports did not output answer of Option No. 201. This is now corrected.
