WINDOWMAKER 2025 R3.0.0

GENERAL ENHANCEMENTS – WINDOWMAKER

PRODUCTS - EXPORT/IMPORT UPDATES

Export Updates now generates a single Excel Workbook containing sheets for all records of a Glazing:

- [Glazing \(Single Cost\)](#) – All Single cost glazing records will be listed.
- [Glazing \(Cost Matrix\)](#) – All 2D matrix glazing records will be listed and for each 2D cost matrix glazing records, a separate sheet will be generated.
- [CMO_OptionID_OptionDesc.](#) - For each option-based cost matrix glazing.
- [Glazing \(Others\)](#) – Unglazed records
- [Catalog](#) – Costing version details

A	B	C	D	E	F	G	H	I	J	K

< > **Glazing (Single Cost)** | Glazing (Cost Matrix) | CMO_1_Dimension Type | GLazing (Others) | CM_300006 | Catalog

Export Updates now include the columns 'Min. Area', 'Rounding' and 'Markup-%'. Users can also modify these parameters using the Export/Import Updates.

Also, Export Updates adds the 'Costhead' and 'Unit Desc.' columns, making it easier for users to filter, review and update glazing costs based on Costhead and unit description. These columns are for reference only and do not affect Import Updates.

When the Costing Version option is **not** available in the licence, users can still update costs within Windowmaker using the following views:

- Single Cost
- <Option>

Cost editing functions as before, with audit trails generated upon saving changes.

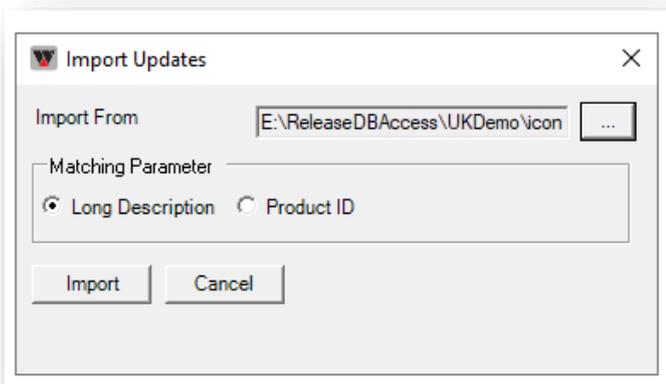

Additionally, Cost columns have been removed from the Glazing <All> view. Instead, an 'Approach' column is now available in the <All> views for both Parts and Glazing, allowing users to identify the cost approach being used.

When the Costing Version option is enabled, costing views are no longer available for Glazing.

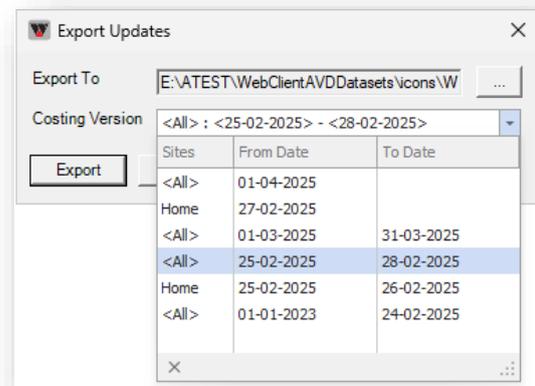

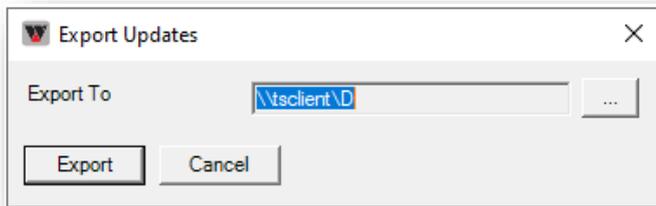

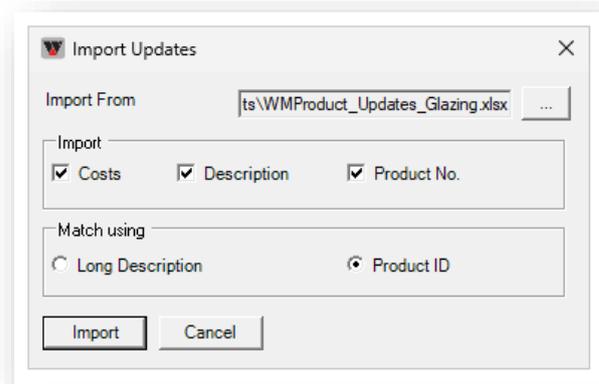

If using Costing Versions, user can select the required Costing Version at the time of Export Updates.

The Import Updates functionality now allows users to selectively import Costs, Description and/or Product No.

Before

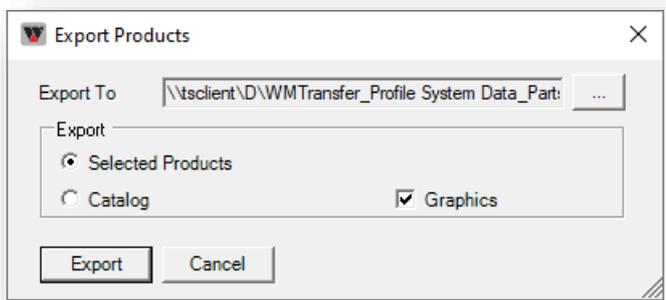

Now

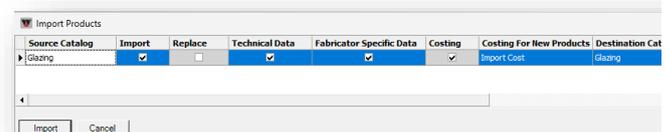

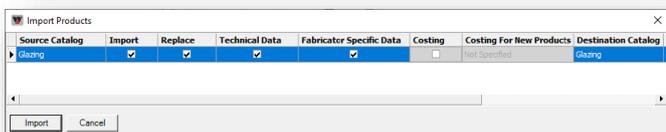

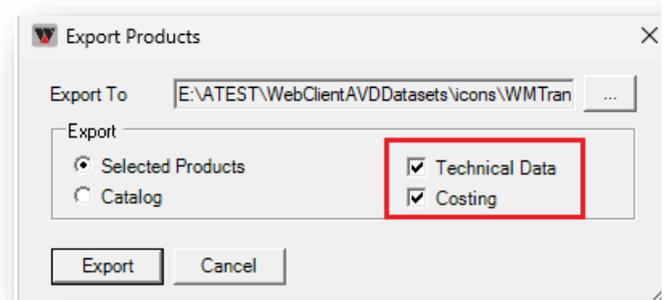

CATALOG - EXPORT/IMPORT

The Export/Import Products functionality now supports Costing Details for Glazing also. Costing information is included in the .CCP (Catalog Costing Package) file, alongside technical data in .CUP (Catalog Update Package) and images in .CIP (Catalog Image Package) files.

Before

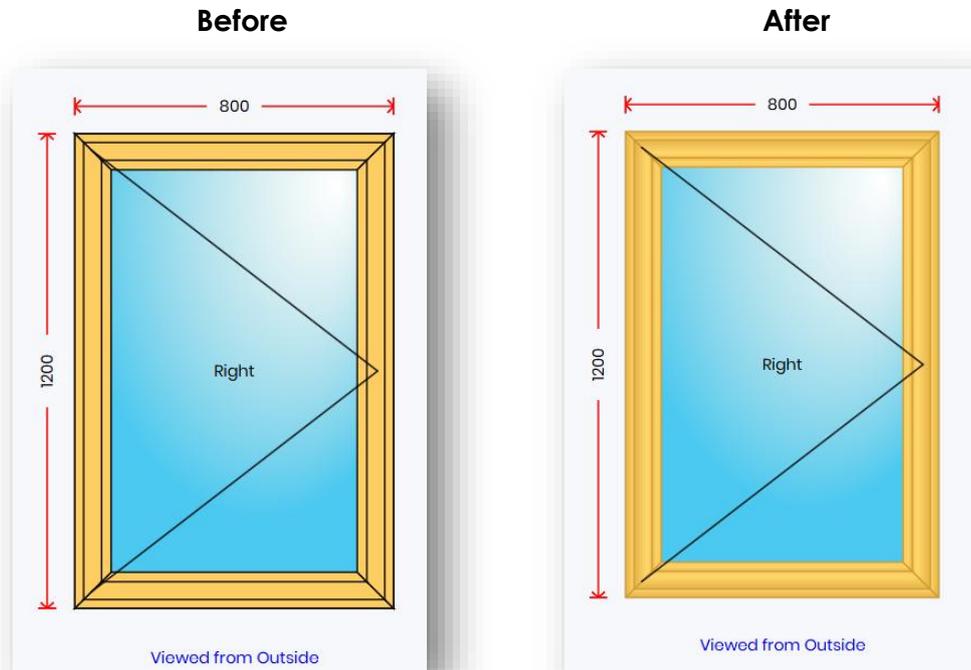

Now

GENERAL ENHANCEMENTS – WINDOWMAKER WEB

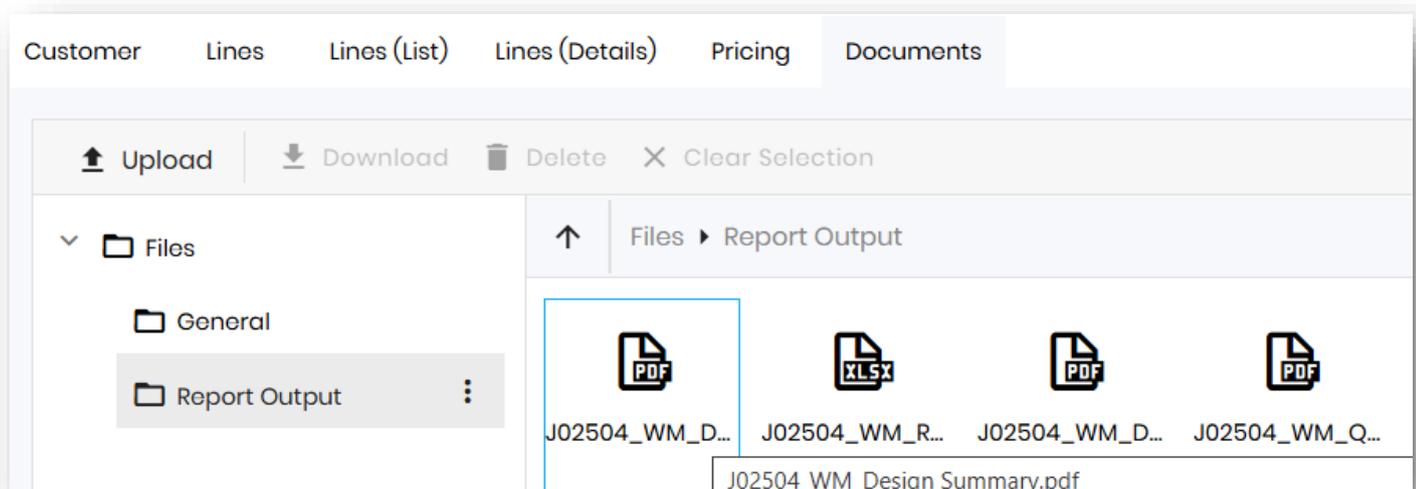

SALES LINE – GRAPHICS

Enhanced the appearance of Sales Line graphics for a more realistic, 3D-like look.

SALES QUOTE / ORDER – DOCUMENTS

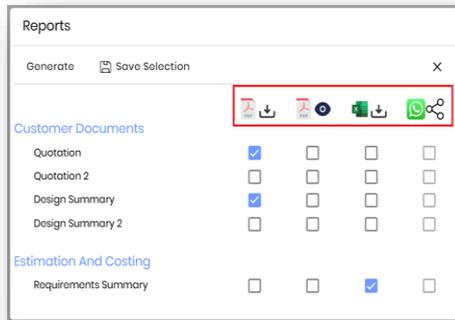

A new "Documents" tab in the Sales Header displays all documents related to the Quote/Order, organized into sub-folders by Action type. Users can preview images and PDFs in-browser, upload multiple documents (automatically creating new Action records) and download files easily.

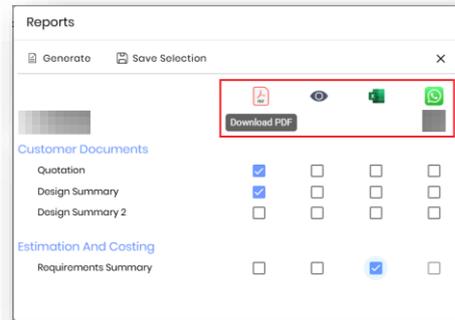

SALES QUOTE / ORDER – REPORT SELECTION DIALOG

Streamlined, intuitive icons with descriptive tooltips are now available on 'Reports'

Before

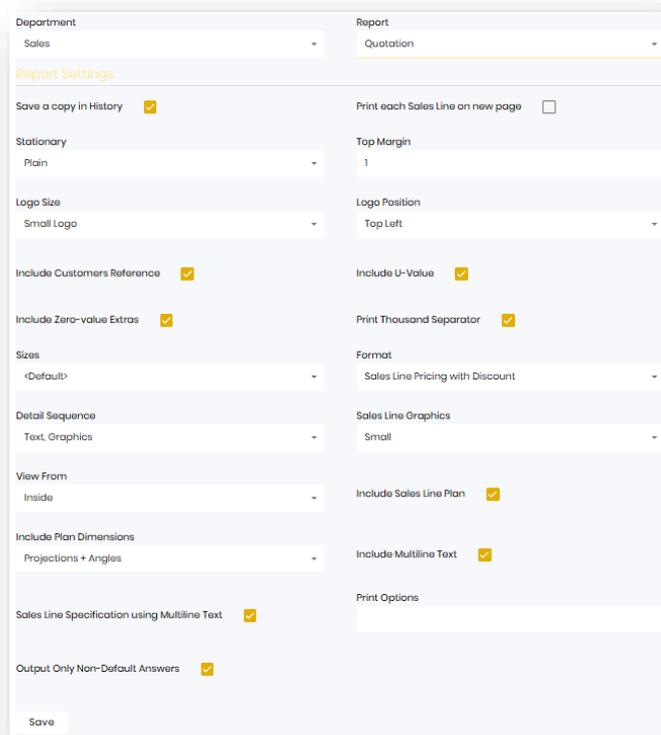

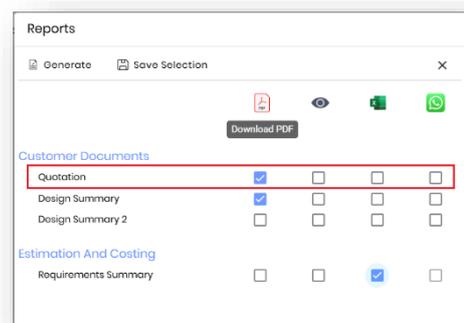

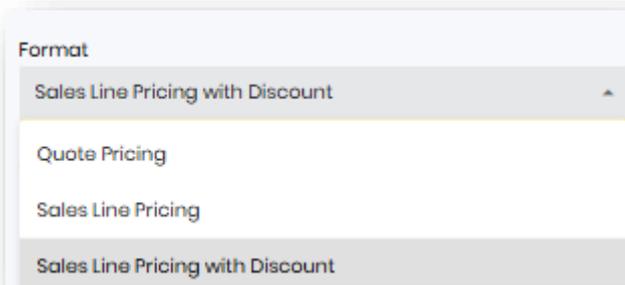

After

SALES QUOTE – REPORTS – QUOTATION

Quotation report now supports more configuration parameters and is available in 3 different formats. Hence, Quotation 2 has been removed.

Payment Terms
50% on Order and 50% on Installation

Total		£	4,016.14
VAT/Std.	10.00%	£	442.00
VAT/Std.	10.00%	£	401.81
Grand Total		£	4,861.95

We trust that this quotation meets with your requirements.

All of the styles of windows/doors shown are provisional; they can very easily be altered to meet your exact requirements. When you do decide to confirm your order, the choice of final styles can be confirmed at the time we take the measurements and carry out the full site survey prior to the manufacturing of the frames.

Kindly note that the above quotation is valid for one month.

Thanking you,

Yours sincerely,

Sales Representative

ENHANCEMENT TO OPTIONS - WINDOWMAKER

COSTING VERSIONS

It is now possible to maintain multiple versions of costing for a Glazing. Each costing version is applicable within a date range and a particular Site.

LINK TO WORKING CENTRE

Windowmaker now links to Fenstek C3 UPVC Window Cutting & Milling Production Line.

LINK TO EXTERNAL SYSTEMS

Seamless Data Exchange for Enhanced Operational Efficiency

Windowmaker facilitates integration with external systems through the use of webhooks and REST APIs. This two-way integration supports automation and helps align business operations by enabling data exchange between systems.

Outbound Integration: Webhooks for Real-Time Data Transfer

Windowmaker uses webhooks to send event-triggered updates to external systems. Webhooks call API endpoints of middleware or external systems using standard Windowmaker or custom payload formats, for example, when progressing the status of a Sales Quote/Order to specific status(es), Webhooks transmit data payloads in JSON format to external systems or middleware designated by the customer. This data can be used to incorporate updates into their external systems as required.

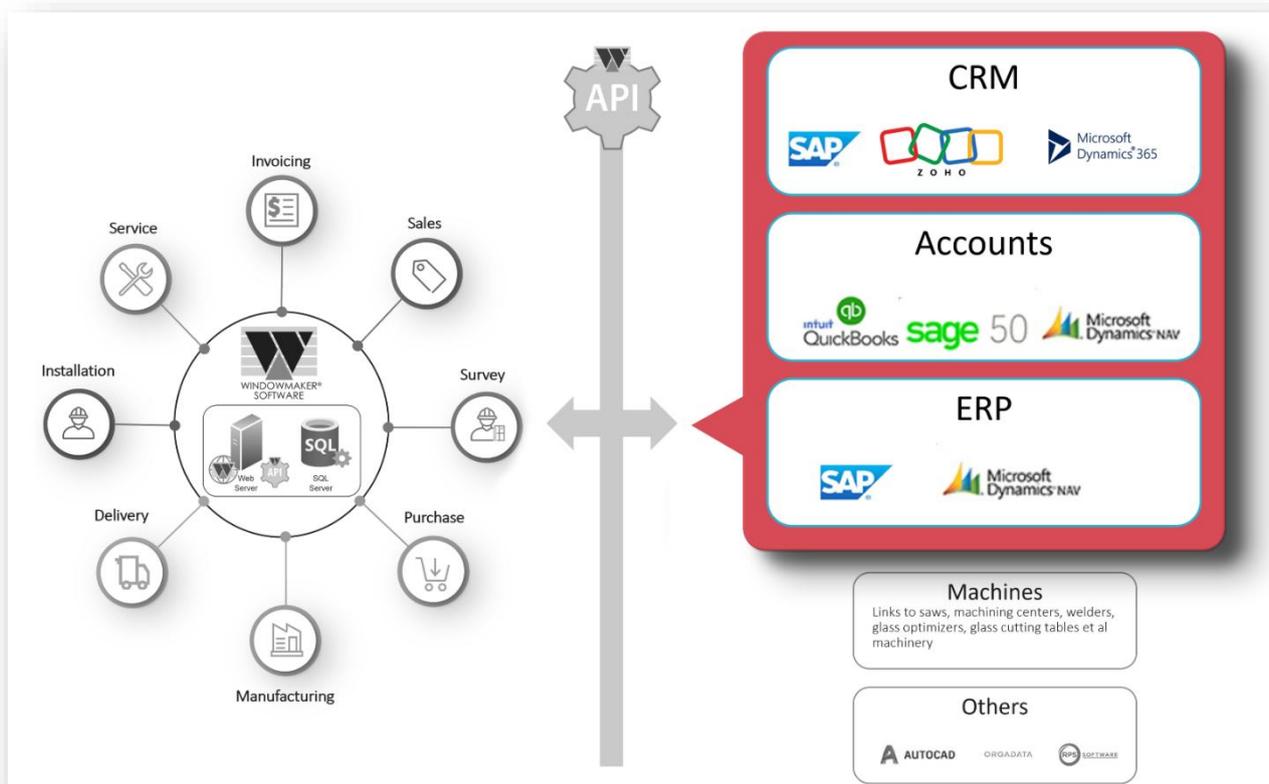

Inbound Integration: APIs for Data Synchronization

Windowmaker provides REST APIs to enable external systems to send data into Windowmaker. This integration approach enables customers to synchronize data across systems and supports their unique operational requirements.

Following data can flow between systems:

- Customer Information
- WM Quote/Order status and other details
- WM Quote/Order Line details
- Stock Consumption
- Etc.

For more details on how Windowmaker can work with your external systems, please reach out to our Sales team.

ISSUES FIXED

Sales – Customer, Sales Headers – User Limit - 46097

Visibility of Customers, Sales Quotes and Sales Orders in WM Web is now restricted based on user-specific limits—Order Type, Area and "View Only Own"—in line with the behavior in Windowmaker.

Sales – Sales Header List - 67943

The missing Cost, Weight & List Price columns have been re-instated on the Sales Headers list. They are now available in the Column chooser also.

Sales – Sales Header Copy - 68884

Copying sales header without recalculation, refreshed the sales line prices instead of retaining the existing price. This is now fixed.

Sales – Line configuration – Entrance Doors - 66807

Windowmaker was sometimes giving 'Contradictory values' error after changing sidelight style from one to other. This is now fixed.

Purchase – Glass Ordering – XML/XML(XSD) – 66575

Separate XML files on ordering Glass using the XML(XSD) or XML formats where not generated as per production sites of the Sales lines. This is now corrected and separate files per site are produced.

Products – Parts- 67273

'Export Updates' for parts with costing via matrices was difficult as there was no filtering mechanism for such records. The 'Approach' column is now added in the Products <All> view to facilitate this.

Products – Systems – Rules - 66806

Windowmaker is giving an empty message with caption 'Error' on opening any rule or after closing any sub-system after synchronization of the data. This is now rectified.

Manufacturing - Process - Link to Other Optimizers – 67660

Users were unable to download 'Link to Optiway' files in the 'Output' folder. This is now resolved.

DATABASE SCHEMA CHANGES

Changes specific to database tables are as listed below:

Table	Column	Change
WMJobQueue	Priority	Added
	ReferenceKey	

Changes specific to each view are as listed below:

View	Column	Change
WMWebhook	Priority	Added
	Service	
	PayloadLevel
